## DESCRIPTION OF CHANGE:

The change is to improve the analog and digital ground separation on XS1-U series 217 balls FBGA devices. This requires the re-assignment of two balls on device package to a dedicated analog ground. This change results in the reduction of noise level in the analog circuits.

XS1-U series 217 Balls FBGA products → Balls N2 and P6 re-assigned from GND to AVSS

## ANTICIPATED IMPACT:

This change is backward compatible - the newly created analog ground domain will still be connected together with digital ground domain on customer products.
